in critical thinking and research!

24/7 access from school or home for every student in your school!

Access Makes Facts Easy to Find

- Read-aloud audio recorded by professional voice-over artists—no robotic text-to-speech!
- Text-highlighting, an important scaffold for below-level readers
- Tabbed navigation
- Online dictionary access
- Students can cite their source in three formats: APA, MLA, or CMS

States

American Indian History

State Studies and American Indian History

Articles Include:

- States
- American Indian Tribal Nations
- American Indians Today

Coming Summer 2018!

Biographies

Articles Include:

- W.E.B. Du Bois
- Iroquois Confederacy
- Eleanor Roosevelt
- Malala

PebbleGo Next supports digital citizenship and college & career readiness

Organizations from ISTE to AASL (& maybe even your own district!) are helping set standards for digital citizenship in the 21st century. No matter what standards you use, PebbleGo Next can help

Theme	Why?	How PebbleGo Next Can Help
Empower your students	Students become lifelong learners when they're allowed to explore topics that interest them. By providing access to a variety of information sources, educators empower students to take a leading role in their education, right from the start. Students learn to leverage technology to research new topics and achieve learning goals, and are ready for the next round of technological innovations.	Easy access to facts with tabbed navigation and online dictionary. Plus, read-aloud audio helps build confidence so even below-level readers have the opportunity to take a leadership role in their education.
Teach responsible digital citizenship	Today's students are born members of the digital world and must learn the rights and responsibilities of digital citizenship. The interconnected digital world affords unlimited opportunity when students learn to respect the rights and responsibilities of citizenship, including the rights and responsibilities associated with intellectual property.	Students learn to cite their source in three formats: ALA, MLA and CMS, a must for becoming responsible digital citizens
Create Critical Thinkers	In an increasingly noisy world, students must learn effective research strategies. Being able to obtain and evaluate information from a variety of resources is integral to learning the difference between facts, opinions, and fiction.	With over 400 articles in three modules, students explore ideas, create hypotheses, and draw well-researched conclusions.
Effective Communicator	Knowledge acquisition is not the end goal. Students must learn effective ways to share their knowledge and research skills with the world. Sharing helps students make connections with each other and deepens their understanding of the subject. Having measurable learning goals helps both the student and the educators evaluate research methods and instruction to ensure continued growth.	PebbleGo Next research helps students demonstrate their understanding in a variety of projects including reports, presentations, art-work, and more. They learn that starting their project with a credible source (and citing it!) is a requirement for a successful outcome.
Promote Collaboration	The use of technology should facilitate increased student collaboration with their peers both in the school building and around the world, preparing them for college and beyond.	PebbleGo Next provides simultaneous, unlimited use to all members of a school community, both within the building and at home.

"If we expect them to teach and to model good digital citizenship, then we must provide them with the tools and resources to do so."

— Susan K. S. Grigsby, EdS, former Forsyth County district media specialist and the 2011 Georgia Library Media Specialist of the Year, PebbleGo Subscriber

- Pricing starts at \$395/year • Include access for every student in your school, from school or home!
- Discounts available for bundling multiple content modules, multiple sites and more!
